As the IB aims to foster a more interconnected and comprehensive understanding of world history, the shift towards a "Global" perspective reflects its commitment to inclusivity, diverse viewpoints, and relevance in a rapidly changing world. This article explores the evolution of the Pearson Baccalaureate History curriculum, the reasons behind its transition to a more global approach, and what students and educators can expect from this modernized curriculum.

The Evolution of the Pearson Baccalaureate History Curriculum

Origins of the IB History Curriculum

The International Baccalaureate (IB) History course has long been recognized for its rigorous approach to understanding historical events, critical analysis, and development of research skills. Initially, the curriculum was largely centered around regional or national histories, focusing on specific countries or periods, which provided deep dives into particular contexts.

Introduction of the "Global" Perspective

Over the years, however, educators and curriculum developers recognized the limitations of a narrow focus—particularly the risk of fostering a limited worldview among students. Consequently, the IB history curriculum began to evolve towards a more global perspective, emphasizing interconnectedness and understanding multiple viewpoints.

The Shift to Pearson's Global History Course

In recent years, Pearson, as a major provider of IB curriculum resources, introduced the "History the Move to Global" component to align with the IB's emphasis on global contexts. This move was driven by the desire to equip students with the skills necessary to analyze history from multiple perspectives and understand contemporary issues within a broader framework.

Why the Move to Global Is Significant

Promoting a Holistic Understanding of History
