Common Questions in Hospitality Financial Management (Chatfield Answers)

In academic settings and practical applications, students and professionals often turn to Chatfield answers?step-by-step solutions to typical financial problems encountered in hospitality. These solutions clarify complex concepts and demonstrate how to apply theoretical knowledge to real-world scenarios.

1. How to Calculate the Cost of Goods Sold (COGS) in a Restaurant

Question: Given the beginning inventory, purchases, and ending inventory, how do you determine the COGS?

Sample Data:

- Beginning Inventory: \$10,000
- Purchases during the period: \$25,000
- Ending Inventory: \$8,000

Chatfield Answer:

The formula for COGS is:

$$\text{COGS} = \text{Beginning Inventory} + \text{Purchases} - \text{Ending Inventory}$$

Applying the data:

$$\text{COGS} = \$10,000 + \$25,000 - \$8,000 = \$27,000$$

Explanation: This calculation helps management understand the direct costs associated with food and beverage sales, critical for pricing and profit analysis.

2. Determining the Break-Even Point

Question: How do you calculate the number of units needed to break even?

Sample Data:

- Fixed Costs: \$50,000
- Selling Price per Unit: \$100
- Variable Cost per Unit: \$60

Chatfield Answer:

The break-even point in units is calculated as:

Break-Even Units = Fixed Costs / (Selling Price - Variable Cost)

Plugging in values:

Break-Even Units = \$50,000 / (\$100 - \$60) = \$50,000 / \$40 = 1,250 units

Explanation: Understanding the break-even point allows managers to determine sales targets and assess profitability thresholds.

3. Analyzing Profitability Ratios

Question: How to compute the gross profit margin?

Sample Data:

- Revenue: \$200,000
- COGS: \$120,000

Chatfield Answer:

Gross Profit Margin = (Revenue - COGS) / Revenue

Calculating:

Gross Profit Margin = (\$200,000 - \$120,000) / \$200,000 = \$80,000 / \$200,000 = 0.4 or 40%

Explanation: This ratio indicates how efficiently a hospitality operation generates profit from its sales before operating expenses.
