Origins of the Dance of Death

Medieval European Roots

The dance of death emerged prominently in the late Middle Ages, a period marked by social upheaval, wars, and plagues such as the Black Death. Artists and writers sought to confront the omnipresence of death through allegorical imagery that depicted skeletons or Death personified, leading groups of people—often representing various social classes—dancing together with Death at their center. These images served as moral reminders that death spares no one, regardless of

earthly status.

Influence of the Black Death and Plagues

The devastating impact of the Black Death in the 14th century intensified the popularity of the dance of death motif.
