Common Questions Covered in the Answer Key

Sample Multiple-Choice Question

Q: Which of the following best describes the law of demand?

- a) As the price of a good increases, demand increases.
- b) As the price of a good increases, demand decreases.
- c) Demand and supply are unrelated.
- d) Demand is only affected by consumer income.

A: b) As the price of a good increases, demand decreases.

Explanation: The law of demand states that, all else being equal, there is an inverse relationship between price and quantity demanded.

Sample Short-Answer Question

Q: Explain how a subsidy affects the supply curve.

A: A subsidy increases producers' revenues, which lowers production costs. As a result, the supply curve shifts to the right, indicating an increase in supply. This shift tends to lower prices and increase quantity supplied.

Numerical Problem Example

Q: If the price of a product drops from \$10 to \$8, and the quantity demanded increases from 50 units to 70 units, calculate the price elasticity of demand.

Solution:

- Calculate the percentage change in quantity demanded:

$$\frac{(70 - 50)}{50} = 0.4 \text{ or } 40\%$$

- Calculate the percentage change in price:

$$\frac{(8 - 10)}{10} = -0.2 \text{ or } -20\%$$

- Elasticity = (% change in quantity demanded) / (% change in price)

$$\frac{0.4}{-0.2} = -2$$

Interpretation: The absolute value of elasticity is 2, indicating elastic demand.
